

1. Introduction

Introduction about system:-

We are developing the “**Electrostore**”. We mainly focus on Process of “Electronic product selling and purchasing”.

The main objective of “Electrostore” is to automate all functionalities of electronic products. We build Admin module, Customer module, Supplier module to make all functions easily. Using this Web, you can manage all electronic suppliers work like “Mobile”, “Laptop”, “Tablet” and “Television” etc. Using this “Electrostore” also you can manage all customer services.

You can view or update date, information Product report about “Electronic products” and “Users”. This Web helps in managing the activity like products Sale, Users Log and Electrostore Shop Information.

The “Electrostore” can be used to Products orders, Suppliers stock and Customers records etc. using this Web you can palace new order and their Products details. You can maintain stock and can check details anytime. This web we can use all Places etc.

This web facilitates Products to maintain the functionalities related to Electronic products suppliers and their orders. “Electrostore” can store and manage all data of the various Electronic products of the Electronic like products order or record and products maintain stock. Using this web user can retrieve any information related to records of customers and product info. Electrostore Shop administration can also manage Electronic products work easily.

In the existing web all, the current works are already computerized. Now this updating web added more features and forms. We can also easily handle all work. The main aim of this project is to manage all the details about product, customer and suppliers etc. there are two types of users available in the project, first one is customer and second one is admin in this project admin can add new system user, electronics products, products company, product types order, order summary etc. An online Electrostore that allows users to check for various electronics products available at the online store and purchase online. The project consists of list of electronics products displayed in various categories. The user may browse through these items as per categories. If the user likes a product, he may add it to his shopping cart. Once user wishes to checkout, he must register on the site first. He can then login using same id Password next time. Now he may pay through a credit card or cash on delivery. Here we use user-friendly interface to make the entire frontend. The middle tier or code behind model is designed for fast processing. In addition, SQL serves as a backend to store electronics products lists data. Thus, the Electrostore project brings an entire electronic shop online and makes it easy for both buyer and seller.

1.3 Operating Environment Hardware and Software

Hardware Requirements:-

Operating System	:	Windows 10, Windows 7
Front End	:	PHP
Back End	:	MYSQL
Reporting Tool	:	MYSQL, PHP
Web Server	:	XAMAPP server
Hardware Requirements	:	Intel(R) Pentium(R) 1.10GHz
RAM	:	4 GB
Hard Disk	:	Minimum 2GB
Printer	:	Laser, Inkjet
Keyboard	:	Multimedia keyboard
Mouse	:	Optical scroll mouse

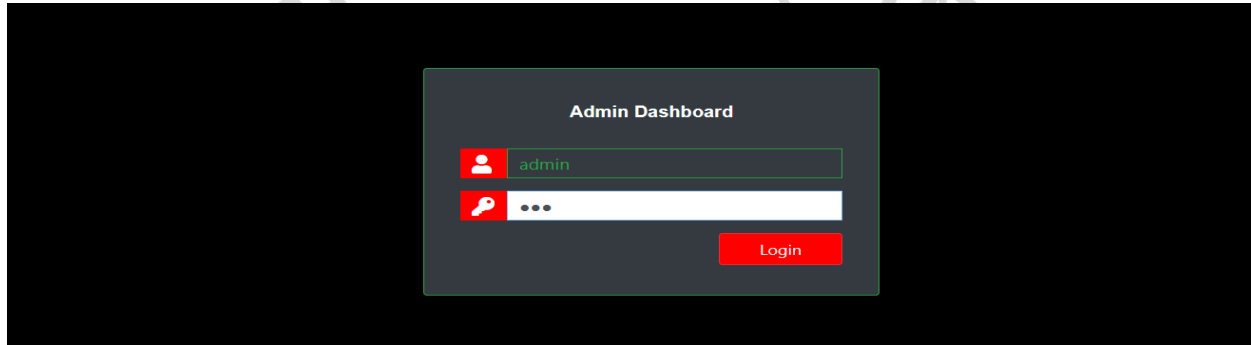

Software Requirements: -

Technology Implemented	:	Apache Server
Language Used	:	PHP 5.62 (Developed in Core PHP)
Database	:	My SQL
User Interface Design	:	HTML, AJAX, JQUERY, JAVASCRIPT
Web Browser	:	Mozilla, Google Chrome, IE8, OPERA
Software	:	XAMPP Server
